Mugasala Rohit

+91 9154716156 | angerkings00@gmail.com | linkedin.com/in/mugasala-rohit | Andhra Pradesh | India

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack development, cloud computing, and intelligent automation. Skilled in architecting event-driven systems with n8n, Ollama, Python, and Java, with additional strength in data analytics and computer vision. Built scalable software solutions, interactive IoT ecosystems, and corporate simulation projects with Deloitte, Siemens, and Forage.

EDUCATION

Godavari Institute of Engineering and Technology **January 2021 - January 2025**

- 7.39 GPA • Computer Science • Bachelor of Technology

Sri Chaitanya Junior College **January 2020 - January 2021**

- 7.9 GPA • MPC • Intermediate

Sri Chaitanya High School **January 2019 - January 2019**

- 8.5 GPA

Year of Completion: 2019

EXPERIENCE

Salesforce Developer Virtual Internship

Salesforce **January 2023 - January 2023**

- Customized Salesforce workflows in VS Code and Lightning, streamlining 3+ core sales processes and improving team adoption and reporting consistency.
- Enhanced sales team efficiency by 25% and improved metrics tracking by 15%.
- Produced Excel- and PowerPoint-based presentations that translated sales metrics into clear insights for stakeholders and supported faster decision-making.

Cloud Engineering Blackbucks Virtual Internship (AWS)

APSSDC **January 2023 - January 2023**

- Reduced AWS costs by 20% through usage analysis, resource optimization, and closer monitoring of cloud consumption patterns.
- Delivered 5+ market research reports that identified high-potential customer segments and informed targeting and outreach recommendations.
- Achieved 95% customer satisfaction by resolving support issues within defined timelines and maintaining consistent communication.

PROJECTS

Employee Management System using AWS

January 2023 - January 2023

- Engineered a serverless employee management system with AWS CloudFront, API Gateway, Lambda, S3, and DynamoDB to support 100+ employee records.
- Enabled secure, scalable employee data storage and retrieval with role-based access patterns and reliable cloud-backed availability.
- Streamlined core workflows with AWS Lambda automation, reducing manual processing effort by ~35% while improving performance and cost efficiency.

AI-Driven B2B Lead & Operations Orchestrator

- Architected a self-hosted n8n workflow system connecting HubSpot, Slack, and PostgreSQL, eliminating data silos across 3 platforms.
- Integrated Ollama-powered local LLMs and webhooks into n8n nodes to classify incoming emails, prioritize urgency, and draft contextual replies.
- Automated ETL pipelines for KPI capture, feeding real-time lead conversion analytics into dashboards and cutting reporting lag by ~60%.
- Tech stack included n8n, Python, JavaScript, PostgreSQL, Ollama, and HubSpot and Slack APIs across the end-to-end workflow.
- Outcome: Eliminated 12+ hours of manual data entry per week and accelerated client response rates by 40%.

Jarvis: Next-Gen AI Workspace & IoT Orchestrator

- Architected a self-hosted browser-based Virtual WebOS that enabled secure code execution, live editing, and project creation in one workspace.
- Rendered a live 3D VRM avatar with Three.js, synchronizing text-to-speech, lip-sync, visemes, and body tracking with sub-second response time.
- Built an OpenCV computer vision pipeline for security cameras that detected people and pushed instant alerts and image snapshots to Telegram.
- Connected hosted and local LLMs via Ollama with function calling, scene observation, context injection, and vector-based memory recall.
- Implemented time-of-day triggers and facial expression tracking to adapt UI tone and personality states across 2+ behavioral signals.

- Launched a wellness submodule using prompt engineering to monitor posture-related metrics and deliver periodic health reminders.

Molecular level particles GUI

- Developed a high-performance 3D engine using Three.js and GLSL to simulate 20,000+ interactive particles with real-time physics and post-processing effects.
- Integrated MediaPipe AI for touchless gesture navigation, enabling real-time hand-tracking control across interactive 3D scenes.
- Tech stack: Three.js, JavaScript ES6+, Vite, MediaPipe Hands, GLSL, CSS3 glassmorphism UI, and Firebase Firestore with App Check.

Nexus: Interactive WebOS Portfolio & AI Sandbox

- Engineered a responsive glassmorphic portfolio in React and Three.js that simulated a futuristic desktop OS across multiple interactive views.
- Connected an n8n event-driven backend to intercept recruiter messages via webhooks and push instant notifications to Telegram.
- Enabled sandbox terminal voice commands with Web Speech APIs and JavaScript, supporting real-time visitor interaction with low-latency input.
- Tech stack included React.js, Three.js, Node.js, n8n, Firebase, and Telegram Bot API for the interactive portfolio platform.
- Outcome: Replaced standard email forms with an automated gateway, creating instant recruiter interaction logs and zero-friction outreach.

CERTIFICATION

Prompt Engineering Specialization
Coursera (Vanderbilt University) **January 2025**

AI Agents and Agentic AI Architecture in Python
Coursera (Vanderbilt University)

AI Agents and Agentic AI with Python & Generative AI
Coursera (Vanderbilt University)

AWS Cloud Technical Essentials
Coursera (Authorized by AWS)

Data Science What is Data Science
Coursera (Authorized by IBM)

Introduction to Software Engineering
Coursera (Authorized by IBM)

Data Analyst Skill Certification
OneRoadmap

Solutions Architecture Job Simulation
Forage

Project Management Job Simulation
Siemens Mobility

Data Analytics Job Simulation
Deloitte Australia

SKILLS

Core Programming & Full-Stack Development: Java, Python, JavaScript (ES6+), Dart, React.js, Node.js, Three.js (WebGL), Flutter, Linux (Ubuntu/Kali), Windows

AI, Automation & Computer Vision: Local LLMs (Ollama, Llama 3), RAG Pipelines, Context Injection, n8n (Self-Hosted), Webhooks, Event-Driven Architecture, OpenCV, MediaPipe Hands (Gesture Tracking), Facial Recognition

Cloud & Databases: AWS (EC2, Lambda, S3, API Gateway), Salesforce, PostgreSQL, SQL, MongoDB, Hive (Flutter), Firebase Firestore

Data Analytics & Product Engineering: Tableau, KPI Metrics Design, Real-time Data Analysis, Git, Git Bash, VS Code, Docker, REST APIs

GENERIC: Agentic AI Architectures, Function Calling & Tool Use, Prompt Engineering
