Mugasala Rohit

Rajahmundry, Andhra Pradesh
Phone: +91 9154716156 | Gmail: angerkings00@gmail.com | Link: linkedin.com/in/mugasala-rohit

Professional Summary

Motivated and tech-savvy Computer Science undergraduate with hands-on experience in Full-Stack development, Cloud Computing, and intelligent Automation. Proficient in architecting event-driven systems utilizing n8n, local LLMs (Ollama), Python, and Java, alongside a solid foundation in Data Analytics and Computer Vision. Demonstrated ability to build scalable software solutions, deploy interactive IoT ecosystems, and complete real-world corporate simulations with Deloitte, Siemens, and Forage. Combining strong analytical and communication skills with a passion for architectural design, edge computing, and continuous learning.

Education

Bachelor of Technology in Computer Science
Godavari Institute of Engineering and Technology | 2021 – 2025 | CGPA: 7.39
Intermediate – MPC
Sri Chaitanya Junior College | 2020 – 2021 | CGPA: 7.9
Sri Chaitanya High School | Year of Completion: 2019 | GPA: 8.5

Skills

Core Programming & Full-Stack Development
• Languages: Java, Python, JavaScript (ES6+), Dart
• Frameworks & Libraries: React.js, Node.js, Three.js (WebGL), Flutter
• Operating Systems: Linux (Ubuntu/Kali), Windows

AI, Automation & Computer Vision
• Specialization & Certification: Professional Certification in Prompt Engineering – Vanderbilt University
• AI & LLMs: Local LLMs (Ollama, Llama 3), RAG Pipelines, Context Injection
• Workflow Automation: n8n (Self-Hosted), Webhooks, Event-Driven Architecture
• Computer Vision & Perception: OpenCV, MediaPipe Hands (Gesture Tracking), Facial Recognition

Cloud & Databases
• Cloud Platforms: AWS (EC2, Lambda, S3, API Gateway), Salesforce
• Databases: PostgreSQL, SQL, MongoDB, Hive (Flutter), Firebase Firestore

Data Analytics & Product Engineering
• BI & Analytics: Tableau, KPI Metrics Design, Real-time Data Analysis
• Developer Tools: Git, Git Bash, VS Code, Docker, REST APIs

Virtual Job Simulations

Solutions Architecture – **Forage**
Designed simple and scalable hosting architecture and gained practical skills in cloud system design.
Project Management – **Siemens Mobility**
Built KPIs and managed interactive dashboards for a railway infrastructure simulation.
Data Analytics – **Deloitte Australia**
Completed real-world forensic technology and data analytics tasks with insights on corporate risk assessment.

Professional Experience

Salesforce Developer – Virtual Internship
Salesforce | Aug 2023 – Oct 2023
• Customized Salesforce environment using VS Code and Lightning framework.
• Enhanced sales team efficiency by 25% and improved metrics tracking by 15%.
• Created impactful presentations using Excel and PowerPoint. **Cloud Engineering – Blackbucks Virtual Internship (AWS)** APSSDC | May 2023 – Jul 2023
• Reduced AWS costs by 20% through usage analysis and optimization.
• Delivered market research reports to identify customer segments.
• Achieved 95% customer satisfaction with timely issue resolution.

Projects

Employee Management System using AWS
Jul 2023 – Aug 2023
• Developed a serverless system using AWS CloudFront, API Gateway, Lambda, S3, and DynamoDB.
• Enabled secure and scalable employee data storage and retrieval.
• Automated key processes using AWS Lambda for cost efficiency and performance.

AI-Driven B2B Lead & Operations Orchestrator

- Designed and deployed a self-hosted n8n workflow architecture to eliminate manual data silos between HubSpot CRM, Slack, and PostgreSQL databases.
- Integrated Local LLMs (via Ollama) and webhooks into n8n nodes to autonomously read incoming client emails, classify urgency, and auto-draft contextual replies.
- Automated ETL pipelines to capture visual KPI metrics, pushing real-time lead conversion analytics into live visual dashboards.
- **Tech Stack:** n8n, Python, JavaScript, PostgreSQL, Ollama, HubSpot & Slack APIs.
- **Outcome:** Eliminated 12+ hours of manual data entry per week and accelerated client response rates by 40%.

Jarvis: Next-Gen AI Workspace & IoT Orchestrator

- Designed a self-hosted, browser-based Virtual WebOS environment that functions as a sandboxed terminal for project creation, live editing, and secure code execution.
- Rendered a live 3D VRM Avatar using Three.js, mapping real-time text-to-speech to automated lip-sync, visemes, and body bone tracking.
- Formulated a standalone Computer Vision pipeline using OpenCV to run person-detection models on security cameras, pushing instant visual alerts and snapshot clearances to Telegram.
- Integrated hosted and local LLMs (via Ollama) with context injection, active scene observation, and vector-based long-term memory recall.
- Built localized Time-of-Day triggers and facial expression tracking (joy, fatigue) to dynamically alter the AI's UI personality and tone.
- Deployed an active wellness submodule utilizing prompt engineering to track metrics and offer health/posture reminders for the administrator.
- **Tech Stack**: Node.js, Three.js (WebGL), Python, OpenCV, Ollama (Llama 3), n8n, Telegram Bot API.
- **Outcome**: Consolidated 10+ standalone tools (CCTV, notifications, media, workspace notes) into a single unified dashboard, increasing remote personal operations efficiency by over 50%.

Molecular level particles GUI
Developed a high-performance 3D engine using **Three.js** and **GLSL** to simulate 20,000+ interactive particles with real-time physics and post-processing effects. Integrated **MediaPipe AI** to enable touchless gesture-based navigation, allowing users to control 3D environments via real-time hand-tracking.

Tech Stack:
Core: Three.js (WebGL), JavaScript (ES6+), Vite
Interaction: MediaPipe Hands (AI/ML Hand Tracking)
Graphics: GLSL (Custom Shaders), CSS3 (Glassmorphism UI)
Backend: Firebase (Firestore, App Check)

Nexus: Interactive WebOS Portfolio & AI Sandbox

- Developed a responsive, glassmorphic portfolio architecture using React and Three.js simulating a futuristic desktop Operating System.
- Integrated an **n8n event-driven backend pipeline** that intercepts recruiter messages via webhooks and pushes instant automated notifications to my Telegram.
- Utilized Web Speech APIs and JavaScript to let visitors run sandbox terminal voice commands in real-time.
- **Tech Stack:** React.js, Three.js, Node.js, n8n, Firebase, Telegram Bot API.

- **Outcome:** Replaced standard email forms with an automated zero-friction gateway, resulting in zero-latency recruiter interaction logs.

Certifications

- Prompt Engineering Specialization – Coursera (Vanderbilt University, 2025)
- AWS Cloud Technical Essentials – Coursera (Authorized by AWS)
- Data Science – What is Data Science – Coursera (Authorized by IBM)
- Introduction to Software Engineering – Coursera (Authorized by IBM)
- Data Analyst Skill Certification – OneRoadmap
- Solutions Architecture Job Simulation – Forage
- Project Management Job Simulation – Siemens Mobility
- Data Analytics Job Simulation – Deloitte Australia

Highlights

- Delivered practical outcomes in 6+ job simulations across top companies
- Successfully completed 3 Coursera programs from AWS & IBM
- Strong foundation in cloud computing, data analytics & scalable architecture
- Eager learner with a career focus on Cloud, AI & Software Engineering
